

Intern Economics/Agribusiness

General Description:

ERA Economics is seeking a part-time intern to work with our small team of professionals in our Davis, CA office. The Intern will work with staff economists to perform research, literature reviews, and data collection. Additional duties may include preparing presentations, drafting economic reports, and responding to client requests for data or other assistance.

The intern will work closely with other economists in the Davis, CA office. Most data collection is performed electronically and limited field work or travel is required for this position. Meetings could take place at client offices and similar locations offsite.

Responsibilities:

Areas of research and analysis can cover any aspect of economic policy. ERA Economics focuses on projects related to the economics of agriculture and water resources. Our particular area of expertise is California water and agriculture. The intern's role may include the following work activities:

- Gather and organize agriculture and water data
- Work closely with other economists to assist with analyses
- Assist in social media presence
- Review current agribusiness news, policy, and regulations
- Perform literature reviews and summarize relevant studies

Minimum Requirements:

- General understanding of or interest in California agriculture and/or water
- Working toward a degree in Agribusiness, Economics, Business, Finance, Agriculture, or a related field
- Proficient in Microsoft Office suite of programs

Desired Qualifications:

- Knowledge of, or interest in, econometric, optimization, and/or statistical methods
- Software experience in Stata, GAMS, R, python, or other programming languages

Compensation:

\$12 - \$15/hr depending on experience.
